

## **Company Fact Sheet: Schneider Electric**

### **Global Specialists in Energy Management**

Schneider Electric is a global specialist in energy management with a unique position to provide innovative integrated solutions making energy safer, more reliable, more efficient and more productive.

The company operates in more than 100 countries worldwide and offers integrated solutions across multiple market segments, including leadership positions in energy and infrastructure, industrial processes, building automation, and data centers/networks, as well as a broad presence in residential applications. Focused on making energy safe, reliable, and efficient, the company's 114,000 employees achieved sales of more than 18.3 billion euros in 2008 (27 billion USD), through an active commitment to help individuals and organisations "Make the most of their energy."

#### **TAC - the Buildings Business of Schneider Electric**

On October 1, 2009 the TAC corporate brand transitioned fully into the Buildings Business of Schneider Electric. As such, the Buildings Business will be one of four foundational businesses of Schneider Electric.

TAC has been a part of Schneider Electric since 2003. Since TAC by Schneider Electric to only Schneider Electric for the past year, fully migrating to Schneider Electric is simply a natural progression.

Schneider Electric's Buildings Business focuses on energy management and security. Central to that security capability are Pelco's video security solutions. The systems of Schneider Electric's Buildings Business are found in over 1,000,000 installations across all continents.

#### **Products and Solutions**

Schneider Electric offers an integrated approach that unites multiple systems on one network across enterprises, from a single software platform. Once integrated, data from those systems is assimilated and converted into information that empowers decisions and actions that enhance efficiency, comfort and well-being for building occupants and owners.

Schneider Electric designs and installs intelligent building management and security systems that deliver solutions for HVAC, access control, video surveillance, lighting control and energy efficiency. Schneider Electric products deliver results that create a comfortable, economical and secure environment in schools, universities, hospitals, hotels, airports, shopping centers, factories, government buildings and just about any other industry one can think of.

In the **Buildings market**, Schneider Electric's products and services solutions cover:

- Power supply and distribution
- Utility management (lighting, air conditioning, elevators, intruder alert, etc.)
- Data exchange (voice-data-image and radio technologies)
- Multi-site remote management
- Energy monitoring and control
- Critical power
- Security

**Schneider Electric integrated solutions result in:**

- Reduced energy consumption
- Improved building performance
- Increased employee productivity
- Reduced costs – both initial investment and ongoing facility operational expenditures
- Opportunities to capitalise on long-term financial value
- New revenue opportunities
- Enhanced building asset value
- Improved customer experience
